*The 2009E and 2010D Build America Bonds series and the 2010C Qualified School Construction Bonds series receive federal interest subsidies. The subsidies were originally calculated at 35% of the interest payents but since 2013 the payments have been reduced under federal sequestration. This schedule estimates sequestration at the current rate of 5.7%, which is scheduled to continue through 2031.
**The final principal maturity payment for the 2010C series is offset by reserves into which sinking fund payments have been made annually.
