SEVENTH GRADE NWEA MAP ASSESSMENT

We use national percentile rankings from the reading and math sections of the NWEA MAP assessment. For each result, we multiply the percentile ranking by 2.2727 to get a maximum score of 225, so that reading and math together yield a maximum of 450 points. You can use the table at left to look up your score.

SEVENTH GRADE FINAL GRADES

Points are calculated for reading, mathematics, science and social studies. Each ‘A’ grade is worth 112.5 points, each ‘B’ is worth 75 points, and each ‘C’ is worth 38 points. No points are awarded for a ‘D’ or an ‘F’ grade.

For example, a student with four As will get the maximum of 450 points, while two As and two Bs are worth 375 points. Use the table above to determine your point totals.
