Seventh grade MAP assessment

We use national percentile rankings from the reading and math sections of the NWEA MAP assessment. For each result, we multiply the percentile ranking by .909 to get a maximum score of 90, so that reading and math together yield a maximum of 180 points.

Seventh grade final grades

Points are calculated for reading, mathematics, science and social studies. Each ‘A’ grade is worth 90 points, each ‘B’ is worth 60 points, and each ‘C’ is worth 30. No points are awarded for a ‘D’ or an ‘F’ grade. The maximum points for final grades is 360.

For example, a student with four As will get the maximum of 360 points, while two As and two Bs are worth 300 points. Use the table above to determine your point totals.

Audition/Portfolio Review

All eligible students are required to participate in an audition or portfolio review. The maximum points for the audition/portfolio is 360.
