

CS4All

Computer Science for All (CS4All) aims to address national racial and gender disparities in the Computer Science field. CPS is confronting that issue by adding Computer Science as a core subject which provides equity, empowerment, and opportunities that maximize the potential of every student to transform and advance their community, nation, and world.

Coming to a School Near You!

DID YOU KNOW...

- 1** 600,000 new computing jobs will be created in the United States by 2022? ([bls.gov/ooh](https://www.bls.gov/ooh/))
- 2** Less than 10% of our nation's high schools offer a Computer Science course? (College Board)
- 3** CS4All at Chicago Public Schools makes computer science a priority in our schools by teaching children how to code, become critical thinkers and creative problem solvers.
