1. The indicated typical location and arrangement, as shown, are diagrammatic in nature and they are provided as a guide for the contractor to layout the stations in the field in conjunction with the school principal/computer coordinator to suit the field conditions. Where device location are not specifically shown on the plans, when device location are specifically shown, they shall be positioned with minor adjustment to suit the field conditions in the locations as shown on the floor plans.

2. The contractor shall be responsible to coordinate the exact locations of device outlets and overhead wiring with the principal/computer coordinator and to make adjustment to suit existing conditions, to ensure a complete and satisfactory, functional installation.

3. Verify with the school authorities the color of the colored wiring they provide before ordering the material. For their school, the choice of the color for wiring may vary on many.

4. In special cases the spacing between the stations may be reduced. The range of spacing will vary between 30 to 60 inches (high school) and 30 inches (elementary school). In no case the spacing between stations shall be reduced to less than 30 inches.
